

Workshop- Vedic Maths by Mr. Amit Bansal

The workshop of the Vedic Sutras (an Initiative of Horizons Institute) was conducted at Sat Paul Mittal School by Mr. Amit Bansal, father of Mishti Bansal, Class V-B and Advitya Bansal of Class Upvan-D. In this workshop, the age-old techniques of Vedic Maths were taught. These techniques, some of which are hundreds of years old, help the students to make calculations that they use in their day-to-day mathematics, quite easy, less time consuming as well as accurate. The different techniques like- multiplication of a number by 5, 25, 125, 11 and all 9's etc. were taught. By using these techniques, students were able to solve complex mathematical calculations easily and also took less time, in some cases even less than the calculator.
