# OPENING CEREMONY

Satyan Innovation Fest 3.0 organized by Sat Paul Mittal School kick started on 11th May 2023 with the goal of fostering and cultivating innovation and entrepreneurial spirit among students to empower them to reach their full potential. "Unleash the Possibilities" was the motivational chant for three-day event. The objective of the fest is to transform the conventional approach to education by offering students an engaging and interactive augmented reality learning experience which leverages cutting-edge design and innovation. The occasion was marked by a joyous assembly attended by the Chief Guest, Shri Rakesh Bharti Mittal, Chairman, Governing Council, Sat Paul Mittal School. He was accompanied by a galaxy of luminaries, Evo Hannan, Founder Innovation X, Akash Ekka, Co-Founder Rocketeers, Aayush Gupta, Founder Fampay and Shri Bipin Gupta, Vice-Chairman, Governing Council, Sat Paul Mittal School.

The Chief Guest was greeted with a floral reception. With the aim of starting off on a propitious note, the ceremonial lamp was lit along with a sacred chant of the Ved Mantra. The Satyans performed a spiritually charged invocation to seek the blessings of the Almighty for the success of the event. Shri Bipin Gupta, Vice-Chairman, Governing Council, Sat Paul Mittal School welcomed the august gathering. He commended that S.I.F 3.0 themed on 'Redefining the future of work, Revolutionizing the future and Redefining reality' provides a perfect platform for young entrepreneurs to showcase their creative skills and innovative ideas. He said that the Fest will offer a rewarding and enlightening experience that will encourage self-learning, increase students' knowledge and immensely help the young minds to develop their interpersonal, conflict-resolution, decision-making, and emotional intelligence skills.

A thought-provoking panel discussion was organized to gain valuable insight on future technologies, concepts, and innovations that might be seen in the coming years. The exemplary education leaders and visionaries, impressed upon that the need of the hour is to encourage young minds to think along creative lines and find solutions to longstanding societal issues. An interdisciplinary exploration in entrepreneurship, social justice and technology will surely empower students to impact society through proactive technology and conscientious entrepreneurship.

The opening video highlighted that the symposium will provide the perfect setting for individuals to hone their quick thinking skills, recognise challenges and devise efficient solutions. Satyan Innovation Fest 3.0 aims to educate young learners the skills of communication, time management, negotiation, and teamwork by guiding them and critically assessing them.

The Chief Guest, Shri Rakesh Bharti Mittal congratulated Sat Paul Mittal School for their efforts to encourage the intellectual curiosity of the students. He talked about his journey across the landscape of tele-communication and the obstacles he faced, all leading to where he is today.

'Your success is inevitable, although it may not happen immediately. You should have the courage to dream big and pursue greatness, even when others are afraid to do so. Through your relentless hard work and dedication, you will surpass your competitors, working tirelessly day and night. By living a few years of your life with this level of commitment, you will ultimately enjoy a lifetime of success that few others can attain' was the valuable counsel given by the worthy chief guest to the competitive youth.

The opening ceremony culminated with the grand finale "Punjab di Shaan- Bhangra," which was a perfect visual and soulful treat. The audience was completely captivated by the exhilarating performance, which showcased the vibrancy of Punjab's rich cultural heritage.

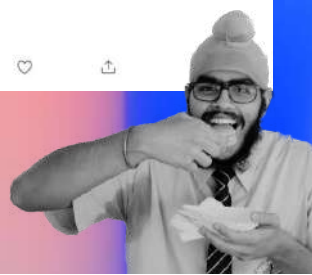

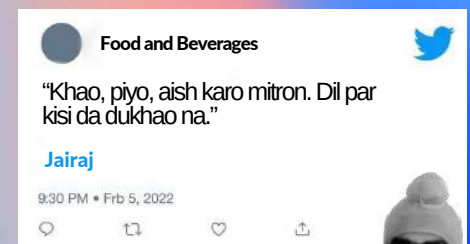

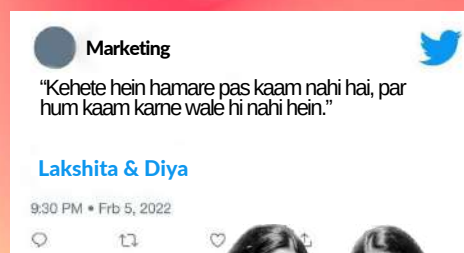

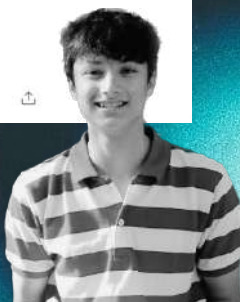

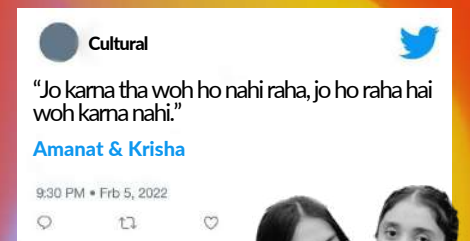

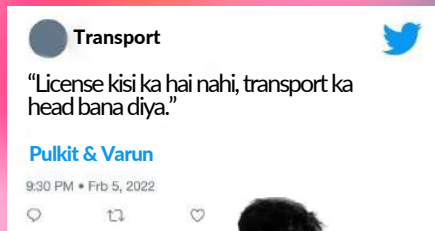

The vote of thanks was proposed by Ms. Bhupinder Gogia, Principal, Sat Paul Mittal School. The Opening ceremony set the stage for the Satyan Innovative Fest and was certainly a befitting start to the great event.

## FT. THE VISIONARIES

### Insight into the Q&A Session

#### Shri Rakesh Bharti Mittal

With the recent surge in AI, what does the future of entrepreneurship look like in the next ten years?

He said, "I feel the future is quite unpredictable. It depends on how the nation decides to go forward with the avenue that has recently opened. From the times of rotary phones to the era of AI, the world has changed drastically in a very short amount of time. There is a fear that robots might one day outsmart us and take over. Technology is a great boon but needs to be used wisely before it becomes a bane".

#### Mr. Evo Hannan

What inspired you to start Innovation X?

'If you talk the talk, you must also walk the walk'  
I had to pave my path and make a niche for myself in a white dominated society. Designing and teaching has always been my passion. I believe that hard work pays off if you're patient enough to see it through. My focus was always to integrate innovation with education and i was able to achieve my goal.

#### Mr. Aayush Gupta

What was your thought process behind starting a Neo bank exclusively for teenagers?

He talked about the importance of financial literacy especially among students. He said 'I remained focused on ideating and brainstorming for innovation. With the recent digitalization of finances, I wanted to empower students in finances in their homes.'

#### Mr. Akash Ekka

How can entrepreneurship be incorporated in aerospace?

He said 'I have had a passion for rockets since I was young. I followed the theory that any problems can be solved through an engineering lens. Therefore, I combined passion with Entrepreneurship and made strides in this field. I am still a student who is always ready to learn new things.

# START-UP BAZAAR

## Workshop 1:

The day started with a workshop conducted by Mr. Ashutosh Mahajan, a Business Strategist and Board Member LPU, who served as a Maha Mentor for the delegates. In the workshop, the students were introduced to the concept of entrepreneurship and were given a run down on how to ensure that the startup becomes successful.

Mr. Ashutosh apprised all about the 5 key characteristics a young entrepreneur should have. He said that there's a lot of work that goes into getting a new venture off the ground and scaling a business for sure. While hard work is undoubtedly important, there is one thing that ensures whether any business will thrive or fail is its owner. More specifically, the qualities of the owner. He greatly emphasized that the proprietor needs to have a vision, should be a good listener, discipline oneself without force and stay resilient, a good leader and attain the equilibrium between studies and entrepreneurship.

## Workshop 2:

Mr Sandeep Verma, Research Associate, Senior Member IEEE IIT Kharagpur acted as the mentor in the second Maha Mentor workshop along with Mr Lottie Mukuka, R&D (Head) AI Expert WHIZROBO. Mr Verma began the session by saying that 'Imagination is better than knowledge'. Imagination knows no boundaries and hence fosters creativity. Innovation is a means to push the boundaries of existing knowledge. Brainstorming was emphasized, with equal importance given to analysing the numerous possible solutions. He said that entrepreneurship is all about thinking outside the box. The entrepreneur needs to find solutions to the problems and needs that people face and come up with ways of delivering these solutions through products and services. In order to find out which "goldmine" niches to approach, one has to think differently from the rest. He also impressed upon the need of team building and networking.

The workshop ended with Q&A session. Queries of the students were addressed and were given a clear understanding on how to put their plan into action.
